

# FJS553/XXX-IO-MAR

## Simplex SC/APC I/O Armored Pushable Jumpers

\*Shown with jacket removed to reveal armor

### FEATURES

- Pre-terminated with SC/APC Connectors on Both Ends
- Rugged, UV Resistant Indoor/Outdoor Rated Jacket
- Equipped with Stainless Steel Spiral Armor
- Pre-tested and Ready for Installation
- Custom Lengths Available
- G657.A1 Fiber (Corning Glass)

The FJS553/XXX-IO-MAR is a ruggedized, pre-terminated simplex jumper equipped with a layer of stainless-steel armor. The spiral wound armor provides excellent flexibility while protecting the fiber against damage caused by rodents. In addition to protecting the fiber from cuts, the armor also prevents damage that can be caused by pinching and overbending. Also available with a white, UV rated jacket.

Amerifiber jumpers are fully tested and visually inspected at 400X magnification to ensure the end faces are clean and scratch free.
